

E-BIKE TEST / ST-LUC

The e-bike is on the rise in Switzerland. This weekend, a selection of electric mountain bikes will be available for testing.

The St-Luc e-bike test is a new event that offers the general public the opportunity to try out e-mtb, in partnership with local sports shops. The test takes place in Tignousa, the upper station of the Funicular, which is the ideal starting point for e-bike tours of all levels.
