

THE MARMOT TRAIL

Vercorin - The Marmot educational trail starts at the Crêt-du-Midi, then follows various tracks through the pines and wooded pastures

From the Crêt du Midi, you are invited to walk through scree, forests and wooded pastures. You come to the mid-way station of Sigeroulaz via the Marmot Trail, an exceptional walk through the Swiss pines and wooded pastures.

Sevenfun, educational panels punctuate the path, which enable you to try your hand at a series of games as well as letting you in on various aspects of the secret life of the marmots. A good hour's walk will enable you to cover this out-of-the-ordinary discovery trail on the edge of the Vallon de Réchy.
